Experience

SENIOR SOFTWARE ENGINEER

ARCOTECH

November/2024 - present

- Develop and maintain backend applications using Kotlin and Spring, building scalable REST APIs
- Work with PostgreSQL, DynamoDB, and Redis to design efficient data storage and caching strategies
- Monitor and deploy services on AWS, leveraging tools like New Relic and JavaScript/TypeScript for integrations and observability

SENIOR SOFTWARE ENGINEER

WWT

September/2022 - October/2024

- Developed cloud-native Kotlin microservices using Spring/JAX-RS, backed by OpenSearch, DynamoDB, and PostgreSQL
- Built CI/CD pipelines with Codefresh, Docker, and Kubernetes, deploying services to AWS
- Worked in distributed agile teams, contributing to critical internal tools and enterprise services

SENIOR SOFTWARE ENGINEER

CONTABILIZEI

June/2021 - August/2022

- Created accounting automation systems using Java/Kotlin, with data managed via PostgreSQL and Firestore
- Deployed and maintained services on GCP with Docker, Kubernetes, and Bitbucket Pipelines
- Delivered tax-related features under regulatory constraints in a fast-paced SaaS environment

MID BACK-END DEVELOPER

PAYSMART SERVICES

December/2020 - May/2021

- Built fintech APIs using Java, Python, and JavaScript with Spring and Serverless frameworks
- Implemented persistence with PostgreSQL, DynamoDB, and caching via Redis
- Automated deployments using Jenkins, Docker, and Kubernetes on AWS

Skills

Languages & Frameworks

- Java, Kotlin, Python, JavaScript, TypeScript
- Spring (Spring Boot, Spring Data JPA, Spring Security, Spring Web), JAX-RS, Serverless Framework, Node.js

Cloud Platforms & DevOps

- Amazon Web Services (AWS), Google Cloud Platform (GCP), Microsoft Azure
- Docker, Kubernetes, Jenkins, Codefresh, Bitbucket Pipelines

Databases & Storage

- PostgreSQL, DynamoDB, Firestore, OpenSearch, Redis
- SQL, NoSQL, ORM tools

Architecture & Development

- Microservices, RESTful APIs, Event-Driven Architecture
- Clean Architecture, Object-Oriented Programming (OOP), Design Patterns

Testing & Automation

- Unit, Integration, and End-to-End (E2E) Testing
- CI/CD Pipelines, Git-based Workflows

Tools & Environments

- Git, GNU/Linux, Bash Scripting
- Agile Methodologies, Jira, Slack, GitHub

Education

FEDERAL TECHNOLOGICAL UNIVERSITY OF PARANA

Bachelor of Software Engineering

March/2019 - present

POLYTECHNIC OF LEIRIA

Exchange student in Computer Engineering

September/2022 - February/2023
